

## D1.3.3 Decision Support Tool (DST)

[www.nereus-project.eu](http://www.nereus-project.eu)

The screenshot shows the NEREUS project website. The header features the NEREUS logo with the tagline "New energy and resources from urban sanitation", the Interreg 2 Seas Mers Zeeën logo, and the Circular economy logo. A green navigation bar contains links for Tools, Democases, Water, Nutrients, Energy, News, About, and Events. The "Tools" link is highlighted with a yellow circle and an orange arrow. Below the navigation bar, the "Strategic tools" section describes resource recovery potential. The "Model cooperation agreements" section includes a green button labeled "Download the model agreements here >". The "Final reports" section lists "Water recovery >", "Energy recovery >", and "Nutrient recovery >". At the bottom, the "Decision Support Tool" section is partially visible, with an orange arrow pointing to it.

### Strategic tools

Resource recovery has a lot of potential in an urban context. Yet a lot of efforts are needed to convince cities, regions, waterboards and citizens about the benefits of implementing resource recovering solutions to reuse wastewater.

NEREUS shows cities, regions, waterboards and citizens about the benefits of implementing resource recovering solutions to reuse wastewater. The project researches, tests and develops strategies to improve the community acceptance.

To have real life implementation and multiplication of the pilot cases, strategies and business models regarding resource recovery technologies from waste water are essential. NEREUS provides strategies and business models based on the experiences within the project.

### Model cooperation agreements

The NEREUS partnership detected a need to make model cooperation agreements available, which can serve as a legal starting point for exchanging water streams.

These framework agreements are perfectly modular and mainly intended to provide insight into the matters that parties should start thinking about before entering into a blind contract with each other.

The model agreements are available in English, Dutch and French.

### Final reports

Read all about the ins and outs of the recovery and reuse demos in the three final reports:

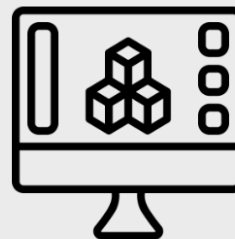

[Water recovery >](#) [Energy recovery >](#) [Nutrient recovery >](#)

### Decision Support Tool

## Welcome to NEREUS Decision Support Tool

The NEREUS Decision Support Tool is a web-based tool designed to aid public and private decision-makers in the decision-making process and speed up implementation of resource recovery from urban wastewater. Nereus DST provides the environmental and budget-friendly treatment trains that can recover water, energy and nutrient.

To start using the tool, please go to [User Input](#) from the navigation buttons. It is recommended to look at the [User Manual](#) before using the tool.

What is NEREUS about?
