

O4.1: Updated toolbox flood defences by practical validated insights

The combined toolbox has been categorised into six topics on the website: 1 Erosion Tests, 2 Survey Techniques, 3 Animal Burrows, 4 Emergency Response & Exercises, 5 Levee Inspection and 6 Emergency Measures. In order to differentiate between the outputs O4.1 and O6.1, we have added the labels Flood Defence or Emergency Response to these topics. These labels show when you click through to the webpage of the topic. Topics 1-3 are labelled Flood Defence and 4-6 are labelled Emergency Response.

Toolbox for professionals

The knowledge and insights gained from Polder2C's activities are made available in the form of a toolbox for professionals in Flood Defence and Emergency Response.
